TITLE

Description

outline is 10pt

I designed

the Durham College 2019-2020

Student Handbook.

I implemented many new elements to the Durham College Handbook while adhering to the Durham College Branding Guidelines to promote the following:

1. Usability,
2. Student efficiency and
3. Personalization

No working template to start with - I completed this 180 paged project from scratch.

both pictures

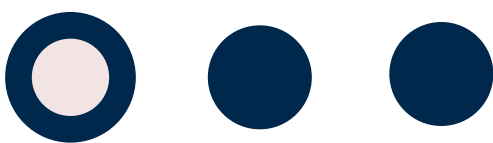

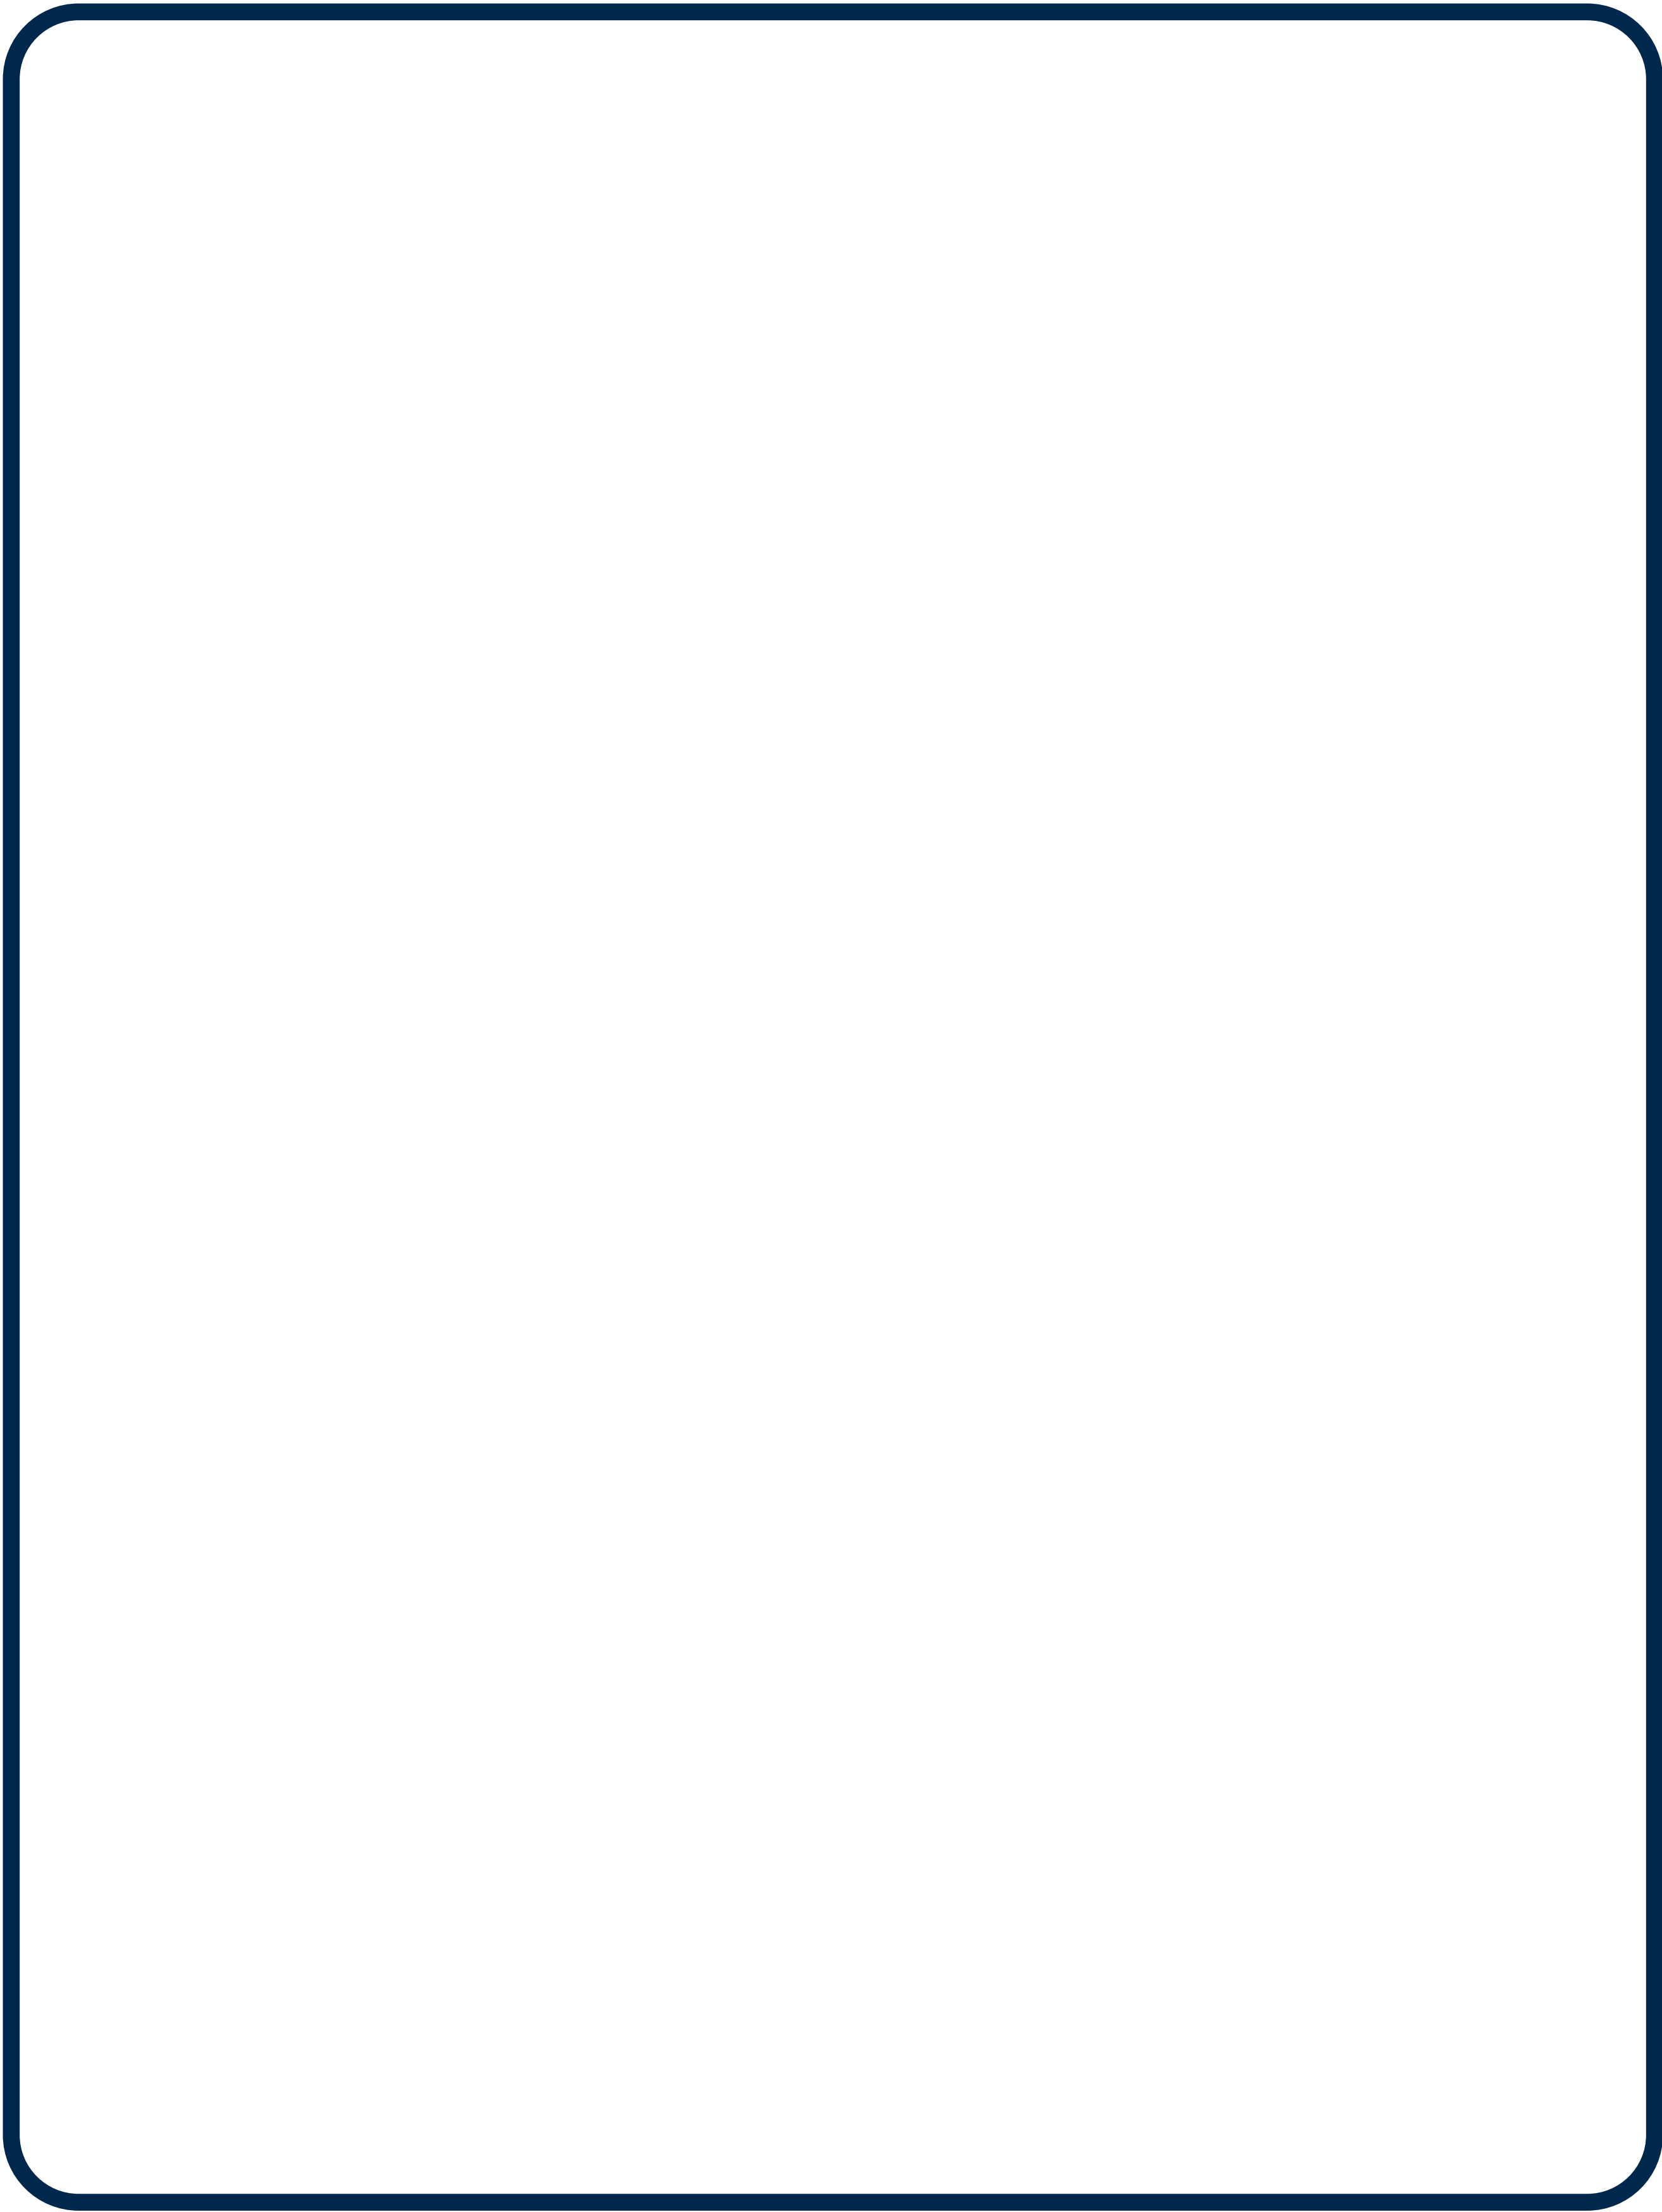

Visual Iconography Element: I added an element of visual icons to the main informational pages for a visual representation of the contents.

Semester Page Concept/Element: I implemented the concept of a semester page before the month of each new semester where students can have space to write out goals and input their own personal schedule.

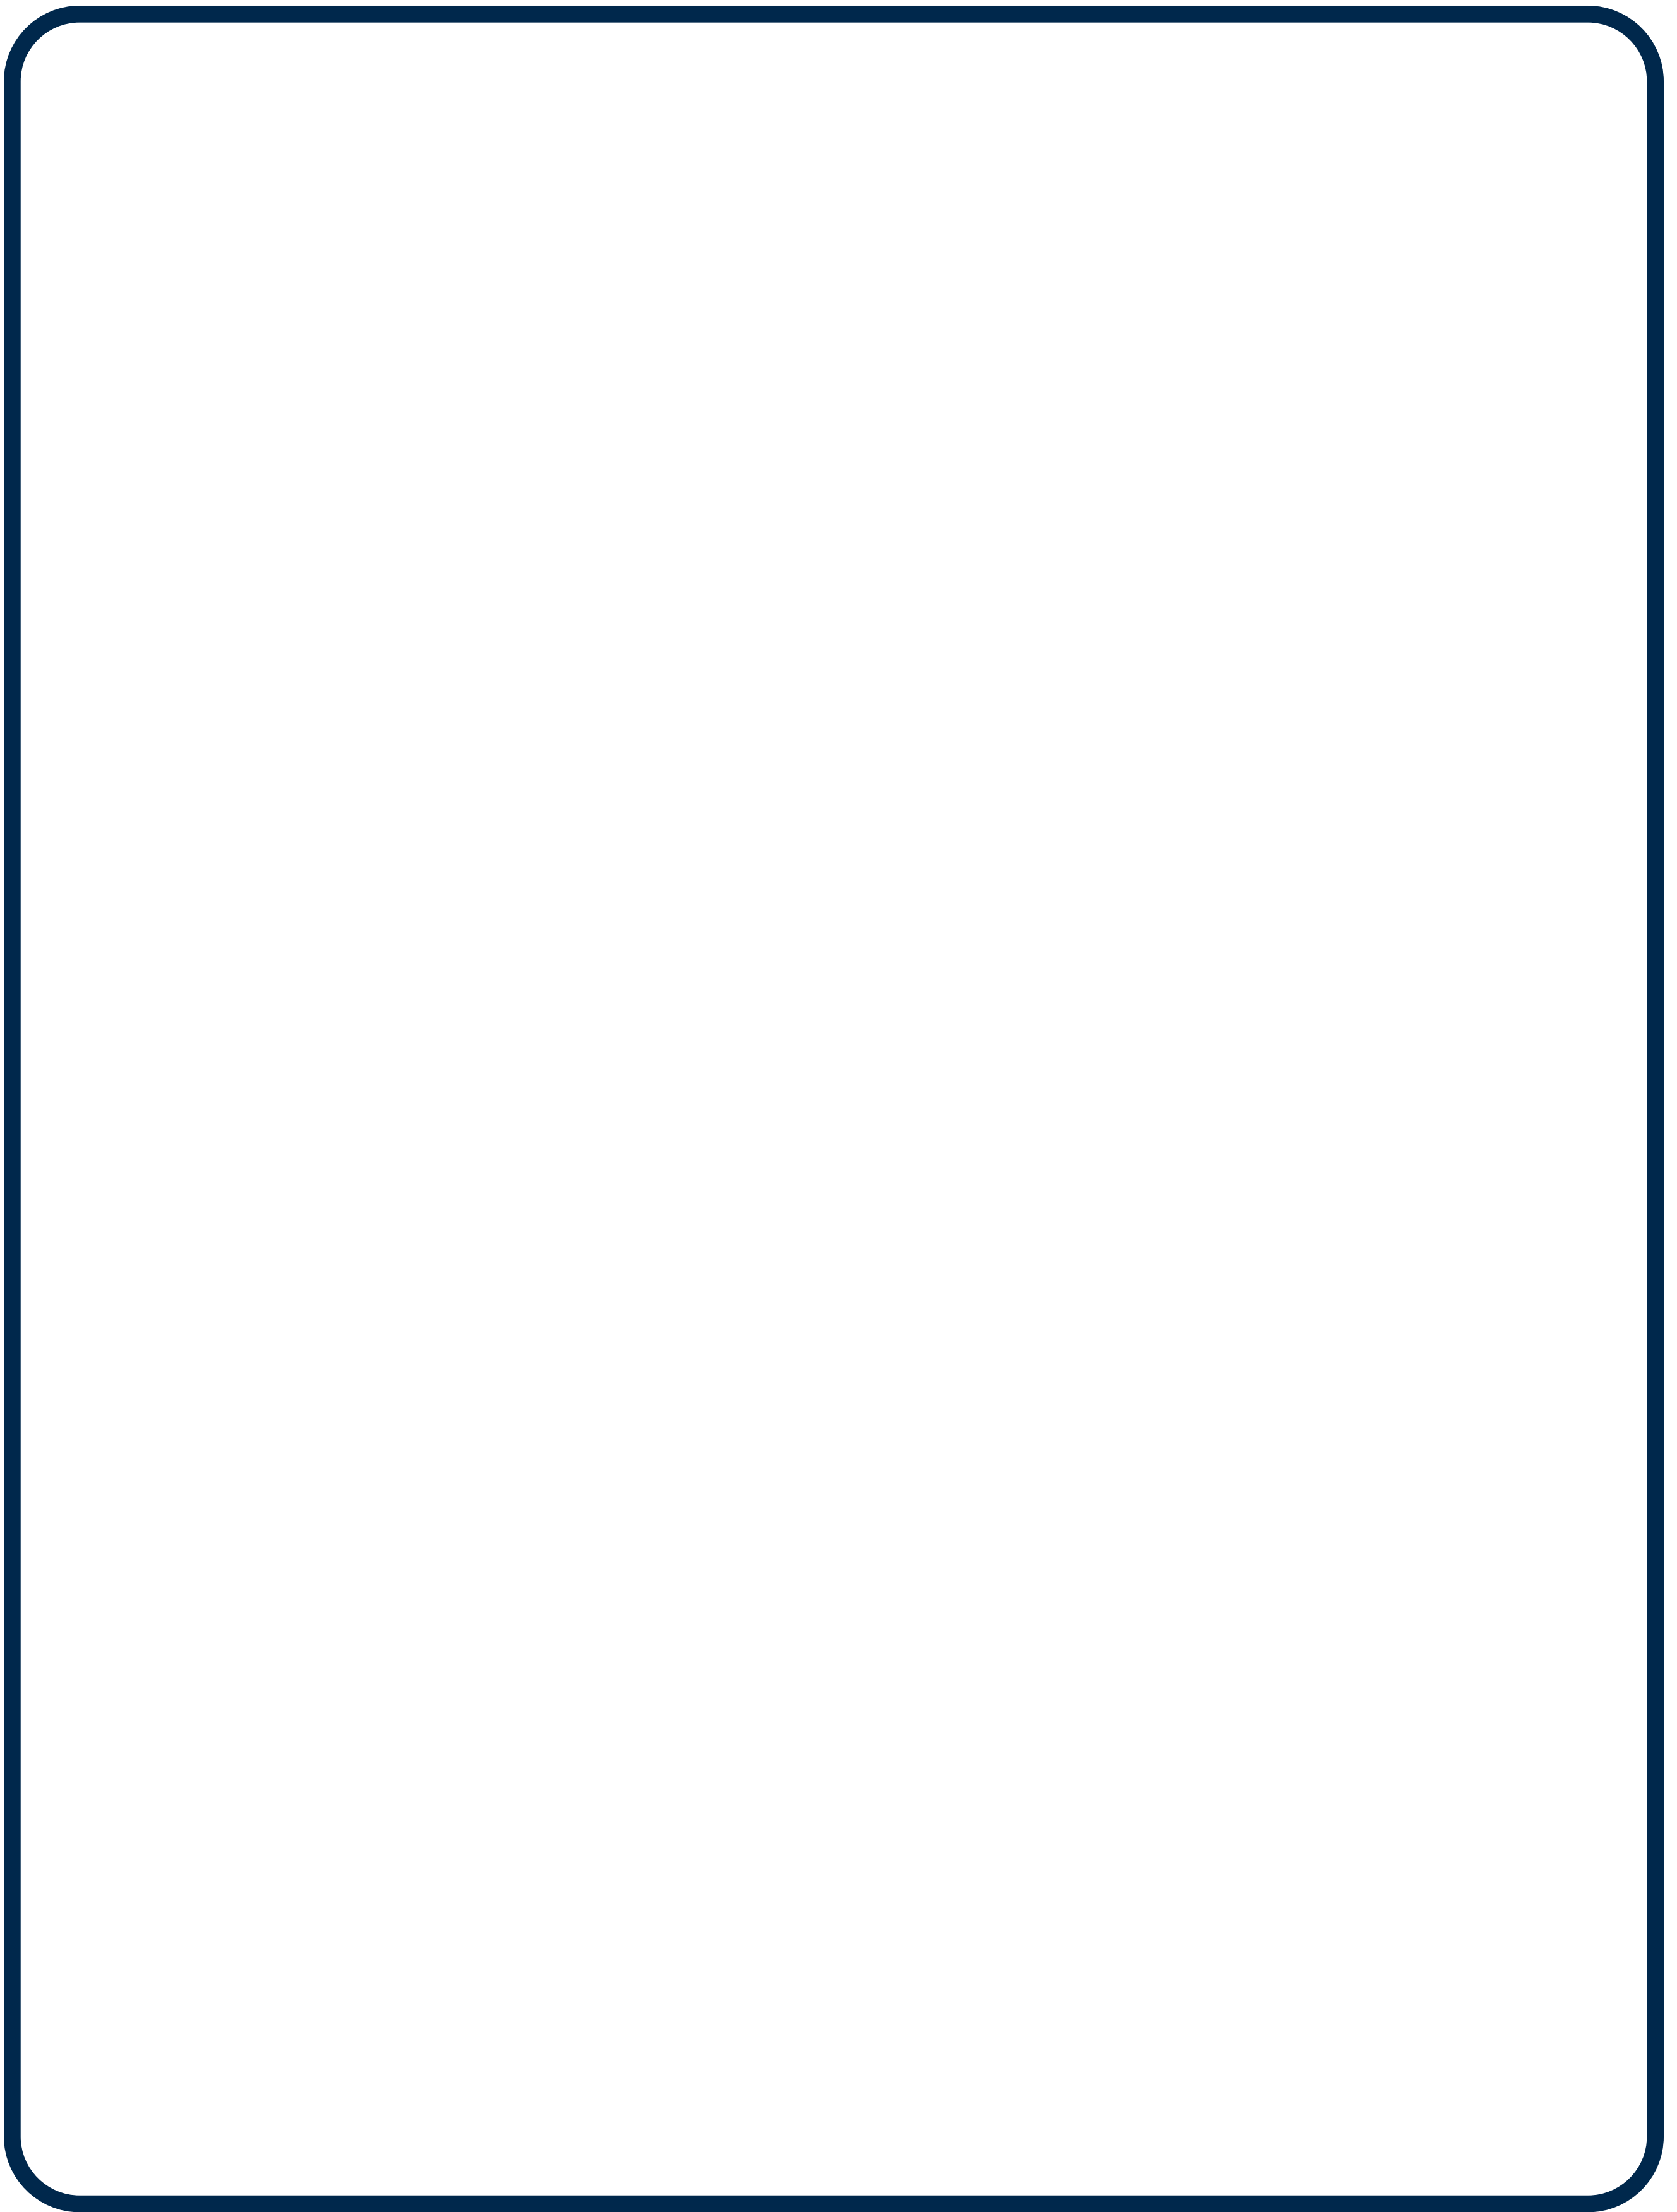

Same text for both pictures

/

Progressive Side Bar Element:The side bar with the month progressively gets "filled" as the months near the end of the semester.

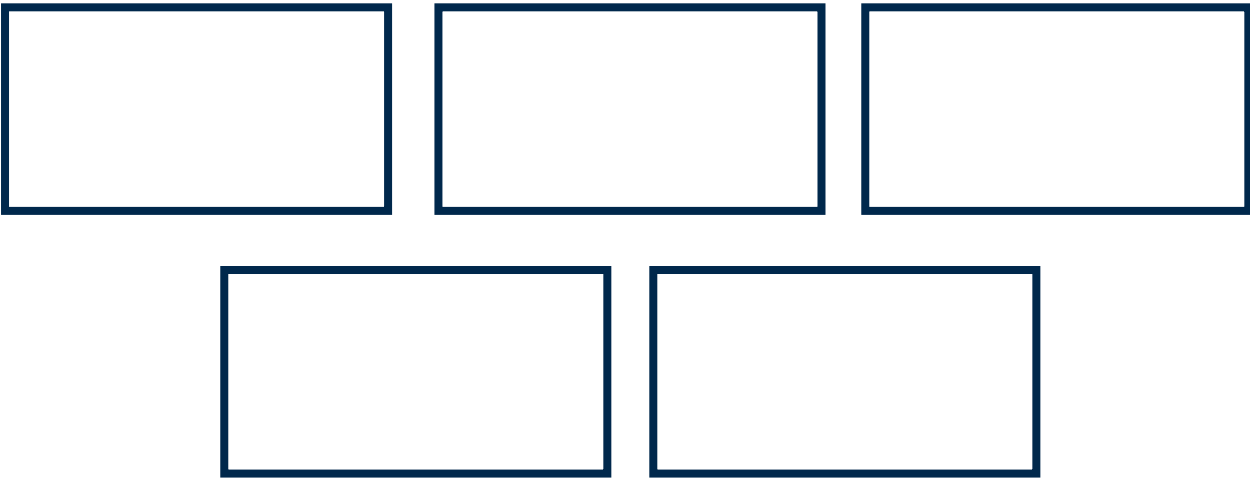

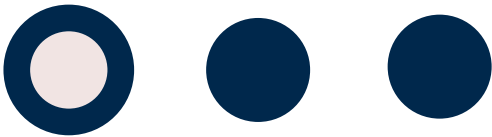

Implementation Encouraging Quotes Element:

On each weekly page I implemented a element of encouraging/positive quotes with the idea that students would be inspired/pushed to continue their studies/life goals that they have planned for themselves.
